### **Re: Airbus Released Product**

Dear Sir/Madam,

Date:- 20.01.15.

As I am sure that you will be aware, Airbus have recently taken the decision, to remove any distributor from their approved supplier list, who is not a Tier 1 supplier directly to them.

This effectively reduces the number of suppliers that they need to manage, passing the responsibility down through the supply chain, for the monitoring process. Airbus will continue to approve manufacturers.

FSL Aerospace have predominantly supported Airbus Sub-contractors rather than Airbus direct and therefore have been classed as a Tier 2 supplier.

Airbus policy now, is that providing the distributor holds an approval to AS9120, they can supply parts for use on Airbus projects. This is providing that everyone in the chain of supply is AS9120 approved and the manufacturer remains on the Airbus approved supplier list for the item concerned.

FSL Aerospace wish it to be known to our client's, that we can continue to provide parts destined for Airbus projects using our AS9120 approval, so nothing has effectively changed.

Where requested by your purchase order, that parts are in furtherance of an Airbus order, we will continue to release parts with an Airbus approved release statement. This statement is your guarantee, that the parts will have been sourced and supplied, in accordance with this new Airbus requirement.

Should you have any queries in this regard, please do not hesitate in contacting us.

Yours faithfully

Andy Bennett  
Quality manager
