

Appendix G

Environmental Policy Statement

FSL Aerospace is committed to working pro-actively with employees, clients, contractors and other interested parties to ensure our operations are effectively managed, monitored and controlled.

The company is committed to:

- preventing pollution and nuisance;
- reducing the production of waste, encourage wherever possible its recycling and manage the effective disposal of waste through approved agencies;
- minimising the actual and potential environmental impacts associated with our activities;
- making efficient use of resources, including energy;
- evaluating environmental impacts when considering new equipment or processes;
- to ensure that our employees support and abide by our customers H&S policy and procedures whilst on-site;
- encouraging company-wide involvement by providing training to all staff on environmental issues and by providing opportunities for staff to contribute to environmental improvements;

FSL Aerospace complies with relevant environmental legislation and other applicable requirements and set appropriate objectives and targets designed to ensure continual improvement in environmental performance.

This policy is available to the public on request.
